Radiatively cooled fluid: prescribed reflecting boundary at R = 3
Dimensionless conditional model; negative eigenvalues mean radial damping
Solved density profiles
gravity parameter 1
gravity parameter 2
gravity parameter 8
number density
radius (dimensionless)
Solved temperature profiles
temperature
radius (dimensionless)
Circular-speed curves
circular speed
radius (dimensionless)
Slowest radial mode: refinement
largest Re(eigenvalue) × 10⁴
radial cells
