deep regime:
$g = \sqrt{g_{\mathrm{bar}} a_0}$,
slope $\frac{1}{2}$
the bend:
$g_{\mathrm{bar}} \approx a_0$
Newton:
$g = g_{\mathrm{bar}}$,
slope 1
10^2
10^1
10^0
10^{-1}
10^{-2}
10^{-3}
10^{-2}
10^{-1}
10^0
10^1
10^2
g/a_0 (the pull stars feel)
g_{bar}/a_0 (the pull of what we see)
