NGC5023: actual brightness, reconstructed full model, and local mismatches
Actual HALOGAS HR
Reconstructed disk + warp + arms
Residual / measured blank scatter
Published southwest extension
u = -61.80 to -37.08 km/s
Unconfirmed faint continuation target
u = 12.36 to 37.08 km/s
Minor offset [arcsec; SE positive]
Major offset [arcsec; NE positive]
Jy km/s per 20×20 arcsec bin
Empirical scatter units
