One universal Gaussian length: ℓ = 3 kpc, reciprocal action
Milky Way radial check
Circular speed [km/s]
Radius [kpc]
Canonical a₀: χ² = 49.06
Alternate a₀: χ² = 36.92
Ou data + frozen errors
At height z = 1.1 kpc
Vertical force equivalent [M⊙ / pc²]
Radius [kpc]
Canonical a₀: χ² = 42.81
Alternate a₀: χ² = 45.32
Bovy–Rix data + frozen errors
Local vertical cut (2σ)
Both witnesses pass the four original MW cuts. Neither passes the separate strict vertical scale-length cut.
